

Repository Contents:

In the repository, you will find two main files:

A. Folder Contents:

This folder contains documents pertaining to the following tasks:

01. Amazon Task
02. Business Case Task
03. Go Bus Task

B. Afaqytask File:

This file holds the Automation Task.

The project has been developed using the following technologies:

01. Selenium with Java
02. Maven
03. TestNG
04. Data-Driven (utilizing Data Faker for generating new data on each run)

C. Important Points to Consider:

Plugin Installation:

There is an issue related to ads on the website, impacting the locators.

So I have to add a plugin to the code for installing an adblock plugin to remove these ads.

Prior to running the script, watch the attached video to understand the issue and the purpose of the plugin installation.
